

North Texas University Chooses Witt for Waste & Recycling Receptacles for New LEED Certified Apogee Stadium !

Mason, OH - North Texas University is no stranger to sustainability - as evidenced by their recently received LEED Platinum certification for the new 31,000 seat Apogee Stadium. So when it came to selecting a vendor for their waste and recycling containers, they opted for large capacity, durable yet decorative, custom metal containers from industry leader Witt Industries.

The University recently took delivery of 50 waste and 50 recycling containers which are designed to complement the décor of the new 31,000 seat facility on the Denton, TX campus. Combining aesthetics with functionality, Witt Industries' custom containers feature the "North Texas", "Mean Green" and eagle logos on the receptacles which are powder coated green to match the university's color scheme. The receptacles are enhanced with protective coated bases to add durability and protect the stadium concrete.

"We are very pleased with the new waste and recycling containers," said Brian Bethea, Senior Associate AD, Facilities and Logistics at North Texas University, "the logos and colors allow the containers to blend seamlessly with the décor of Apogee Stadium."

"Witt Industries is the premier supplier of waste and recycling containers to sports venues and we're excited to be a part of the tradition of on-campus football at NTU," said John Winfield, National Sales Manager. "This is a gorgeous facility, and we're happy to help them keep it clean."

Witt Industries, a woman owned manufacturer of a full range of metal waste and recycling receptacles for indoor or outdoor environments, was founded in Cincinnati over 100 years ago. They supply receptacles to many collegiate and professional sports facilities around the US.

Waste & Recycling Receptacles !

Combining functionality with aesthetics, high quality Witt receptacles serve as site furnishings because they enhance the surrounding décor. In addition to major league stadiums and arenas, Witt Industries products are used in many commercial and institutional settings, including hotels and motels, commercial office lobbies and atria, hospitals, casinos, schools, restaurants, and more.
